About Circumwise

Circumwise is a medical practice specializing in the circumcision of boys from birth to adolescence. We are part of the Circumcision Australia group of Doctors. We provide a quality service for those who choose to circumcise their boys for personal, religious and cultural reasons. We see families from all over the state of Victoria as well as Tasmania, NSW, WA and NT.

What is circumcision?

Circumcision is a simple surgical procedure that removes the foreskin—a sleeve of skin covering the tip of the penis. The circumcision technique we use involves the Plastic Circumcision Device combined with the prior application of anaesthetic cream.

The procedure can be completely pain free and there is no need for general anaesthetic or hospitalization.

The procedure is quick, safe and produces an excellent result.

Which age is best for circumcision?

We provide a service for boys from birth to adolescence (around 12 years of age)

About our service

We provide a comprehensive service which involves three consultations. The first is an initial meeting with our doctor to discuss the procedure, the second is for the circumcision, and then a follow up appointment 2-3 weeks later.

We also provide support 24 hours/ 7 days a week, in the event parents have any concerns following the procedure.

For families who travel a large distance to utilize our service, or for those who have limited time available, we can usually organize to attend to the first consultation and the circumcision on the same day.

Parents are welcome to come in for a no obligation consultation with our Doctor for which there will be no charge should they decide not to go ahead with the procedure. A doctor's referral is not required.
